

Introduction to Global Shamanism

Instructor: Dan Huber

Class #46: Mondays, February 2 & 9, 9am-4pm

Welcome to Introduction to Global Shamanism!

Thank you for your willingness to venture into the mystical and powerful world of Shamanism! Shamans have been helping the planet and its inhabitants for over 500,000 years. Rather, however than seeing Shamanism as an unknown and mysterious field of inquiry, I would encourage you to consider the Shamanic state of Consciousnesses as something we all possess. While it can seem mysterious and at times unusual, it is designed that way to help us break out of our habitual log linear ways to thinking. Using drums, rattles, and other forms of sound healing, helps us quiet the mind, and access this hidden level of consciousness for your personal well being.

In this journey, you will learn many valuable tools and methods to help you not only solve your personal life dilemma, but also help heal the earth and all that call earth home.

We will be using drumming, rattling and Tibetan Sound healing as part of our adventure. If you happen to have a drum rattle or Tibetan bowl please bring it to class. If not, I have plenty for you to share.

Looking forward to sharing this adventure with you!

Dan Huber, Ph. D.
